

# What's on the Menu?

Animals eat a variety of things. Some eat plants. These animals are **herbivores**.

Some animals eat only meat. These animals are **carnivores**.

Some eat both plants and animals. These animals are **omnivores**.

Look at the pictures below. Draw an arrow from the mouse to the picture of the food item that the mouse would eat.

**Is the mouse an herbivore or a carnivore?**

Now draw an arrow from the owl to the picture of the food item that the owl would eat.

**Is the owl an herbivore or carnivore?**

**\*\*By connecting the food items above you made a FOOD CHAIN!!\*\***

Can you come up with a different example of a **food chain** by using animals from the Missouri Habitat area?
